### Reading 2: News in brief

a. Read the newspaper stories below and match the headlines from the previous page to the correct story.

1

May is an important month in the UK as it's a time when elections are often held. Not just national elections, but also local ones and for European MPs (or MEPs, as they are known). It was thought that May

was a good month to get voters to the polling stations. However, in recent years turnout has been declining and it's not unusual for only 30% of those eligible to vote actually turning up to mark their cards.

2

The Australian Prime Minister has resigned after a series of scandals have rocked her government. "After three defeats in parliament, and unable to effectively pass any

new laws, it was almost inevitable," said one political commentator. The resignation means that the country will be going to the polls for the third time in just four years!

3

Earlier today, the US President met his Japanese counterpart. They are holding talks which will cover topics ranging from trade to environmental issues.

The talks are particularly important for the Japanese President who recently faced a vote of no-confidence and has a slim majority in his parliament.

4

"It's great to see the seeds of democracy taking root," said one politician. Of course, they were referring to recent events in a number of Middle East countries where the governments that had been in power for

many years have been toppled. But it's very difficult to know exactly what democracy is. In Germany, the country is ruled by a coalition as there are so many parties. While the USA is effectively a two-party state!

5

The new mayor of London has promised voters that she will carry out all her campaign promises despite opposition from the current UK government. "I was elected by the

people of London to serve them, and that's what I shall do," she said. The first thing she plans to do is abolish the congestion charge which was introduced in February 2003.

2. Who is likely to lose their job?
