

# Which bones go where?

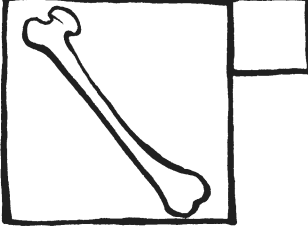

There are 206 bones in the adult human body and they come in all shapes and sizes. Write a letter in the box to match each bone to the right part of the body.

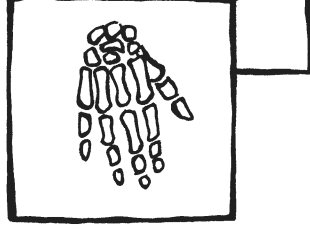

**Did you know?** The smallest bone in your body is in your ear and it's tinier than a grain of rice!

**Did you know?** You have the same number of bones in your neck as a giraffe? Giraffe neck vertebrae are just much, much longer!
