

Online presentations—Pre-Intermediate

Let's discuss

A Read the text and answer the questions.

There are a lot of online **presentation tools** which enable us to create and show ideas and projects in an interesting and dynamic way. Online presentations have more attractive transitions and visual effects. Also, you can add interactive tools to make exciting presentations.

You can communicate your ideas to friends and classmates by sending a link via email and people can watch them whenever they want to.

1. Why would an online presentation be useful for your school projects?
2. Have you ever made a presentation on a computer or on another digital device? What did you like and dislike?

Let's analyse

B Look at the example of a project about a town in England made with a presentation tool. Answer the questions in pairs.

Shrewsbury Town

- What kind of town is it?
- What can you do here?
- Is it a fun place to live?

1. What is the name of the town?
2. What kind of information is given in the presentation? How do you know?
3. Who do you think took the photos of the town in the presentation?
4. What visual and interactive tools would you add to make it more interesting?

DSN GLOBAL: The font style and size is not consistent. Please check and ensure the use of correct font.

Particularly noticeable difference between Page 1 and Page 2 - Page 2 appears to have Calibri, Page 1 Arial. The Let's Do It section is particularly noticeable.

Let's do it!

- Step 1** You are going to make a presentation about a city you have visited or would like to visit. Think about the typical food, monuments, music, traditions and the more modern, fun aspects of the city that someone your age would like to know about.
- Step 2** Use your own photos or search for some photos online to include in the presentation.
- Step 3** Go online and search for a web tool to help you create a presentation.
- Step 4** Create your presentation using your images, music and even video if you want. Make sure you include some text too. Use different colour fonts and make the presentation interesting, with useful information and facts about the city.
- Step 5** Share the link with your teacher and classmates, and look at their presentations too. Have you presented different cities? Which city do you think your classmates would most like to visit and why?
